

Scandia ECO

## Scandia - the environmentally smart choice

MADE IN  
SWEDEN

The Scandia machine is something of a hallmark for Broddson. Now we have taken a real development step and let all the mechanics in the elevator sweeper be driven with the towing vehicle's hydraulics. We have thus been able to remove the diesel engine that has been mounted on Scandian. This provides a number of benefits, especially for the operating economy. Maintenance is simplified and no refueling of the units is needed anymore. -Environmentally friendly and timely

### BENEFITS

- Requires less maintenance.
- Less fuel cost.
- Reduced emissions
- Cheaper service costs

### TECHNICAL SPECIFICATION

- Sweeping width: 2.500-3.000 mm
- Length: 6.660 mm
- Width: (side brushes not included) 2.260 mm
- Height: 3.550 mm
- Curb weight: 4.300 kg
- Gross vehicle weight: 6.000 kg
- Number of tires: 2 or 3
- Tire: 225/75R 17.5"
- Elevator system Squeegees mounted on 3 elevator belts Conveyor mat
- Endless mat with adjustable speed
- Brush system: Automatic relief valves PPS Hydraulic Sauer Danfoss
- Water tank: 1 150 liters
- Water pump: Electric
- Transport speed: Max 40 km/h

### STANDARD EQUIPMENT

- PPS on all 3 brushes
- Support legs
- Working lights
- Electric waterpump

### OPTIONS

- Rear view camera
- Central lubrication system
- Scraper
- High pressure washer
- Air brakes
- Angular adjustable side brush on the right and left side
- Wireless control panel
- Color of your own choice
- Side displacement of drawbar
- Hydraulic water pump
